

RP Reds now train Maoist rebels in India

By Jerome Aring

THE COMMUNIST PARTY OF THE Philippines (CPP) is now only denying a longstanding practice to train Maoist insurgents in India, according to reports circulating in the Department of Foreign Affairs (DFA).

In 1997, DFA spokesman, who asked not to be named, said he did not want to say whether an official would be able to say yes or no to the Philippine government's request to stop the training of Maoist rebels in India.

DADITAMA (DAVAO, DIGO5, TAGUM, MATI)
PASTORAL STATEMENT ON AERIAL SPRAYING**

We, the Archbishop of Davao and Bishops of Digos, Tagum, and Mati and our auxiliary Bishops, gathered in the Bishop's House, Tagum City from 2-3 December 2008, together with our Vicary General, Pastoral Directors and Lay Leaders of different Apostolates and Programs, do hereby declare:

That, in our desire to be informed of the issue on aerial spraying, we have invited the following concerned groups:

- 1) Mamanayang Agri- sa Aerial Spray (MAAS) / Interface Development Interimists, Incorporated (IDII) represented by Ms. Anna Fuentes;
- 2) Philippine Banana Growers and Exporters Association (PHICEA) led by Mr. Stephen Amig;
- 3) Department of Health (DOH) Davao del Norte Led by Engr. Rex Labadina and Dr. Agapito Hernandez;
- 4) Department of Environment and Natural Resources (DENR) led by Mr. Tortilla;
- 5) Department of Agriculture (DA) led by Mr. Rodrigo Madatung - Fertilizers and Pesticides Authority.

That we have asked for clarification from each group presentation. After the clarifications have been made, we thanked the presenters and their companions and presented them with gifts symbolic of our gratitude and appreciation.

That we ended our quarterly meeting without a collective decision on the issue on aerial spraying.

That on 2-3 March 2009, our first quarterly meeting of the year, we discussed ourselves and discussed again the aerial spraying issue by asking the question: "Based on the pros and cons on the aerial spraying issue, what can be the DADITAMA stand?"

That on March 3, after listening to the cluster reports, we the spiritual leaders of this ecclesiastical province of Davao have decided to make the following statements:

1. Based on the information and clarifications gathered during the two quarterly meetings, we believe that there are no sufficient data to warrant total ban on aerial spraying.
2. To avoid future harmful effects in the use of fungicides safety measures to the regulated use of fungicides should be strictly implemented with corresponding sanctions by collective efforts of national agencies, LGUs, and local MOEN.
3. We recommend that the multi-parties monitoring team established by the government agencies to be more active in monitoring the operations of banana plantations to do more exhaustive study and scientific research on the effects of aerial spraying to their respective areas of responsibility.
4. We recommend to everyone concerned to seriously consider the CBCP recommendation regarding the shift to organic farming as safer agricultural practice.
5. We deplore the formation of the issue by ideological and vested interest groups.
6. We urge all contending parties to sit down together to resolve the issue through a truthful and mutually respectful dialogue for the sake of the common good.

Signed:

5. **RESEARCHERS** AND **THEIR** **WORK**
 explored the structure of 10 American
 leaders from three friends or foes
 perspective, asking for 10
 personal qualities that defined the
 individual leader. It was the personal
 characteristics.

During the 1970s, the U.S. Environmental Protection Agency (EPA) conducted a study that found that the use of herbicides in agriculture was linked to an increase in cancer rates. This led to the passage of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) in 1972, which established a regulatory framework for the use of pesticides in the United States.

There is one other important point to make. The old plant layout, essentially a grid, facilitating everything and maintaining low inventory levels, is being replaced by a new layout, one that is more compact and designed to speed up the entire process.

There are several other factors that may be contributing to the problem. For example, the use of a single, standardized questionnaire may not be sensitive enough to detect subtle differences in the way that different groups of people experience the same situation. Additionally, the study may have been limited by the use of a convenience sample, which may not be representative of the broader population.

Bro. Eddie says he was offered Cabinet posts

the Institute (June 1, 1989) contains various communications regarding this. All the "bulletins" are only in English, but the Committee and staff did not feel it necessary to inform them in Vietnamese. It is the official policy of the Institute of the Vietnamese American Studies to publish all of its communications in English. It is the only language of the Institute.

Very sincerely, the Committee would like to say that 100% per cent of the Vietnamese American Studies Institute is composed of Vietnamese people and is for the Vietnamese people.

Respectfully, and to be sure, the Institute will continue to be open to all who wish to contribute to the study of the Vietnamese American Studies.

The technology that made the first microcomputers was a product of American and West German. In fact, until after the 1980s, American firms got patents on all the important products. There was little real Japanese technology. It was not until the late 1980s that the Japanese began to make a significant contribution to the technology of microcomputers.

Immunologic system problems

Patients often develop a sensitivity to various allergens, such as dust, pollen, mold, and food. Allergy testing is often done to determine which foods are causing the allergic response.

Patients with diabetes mellitus are at risk for developing autoimmune disease, such as the thyroid gland.

to the fact that the system is not a simple one, according to the author.

In the end, the author states that the system is not a simple one, according to the author.

Although the authors found no significant differences in the prevalence of *Y. enterocolitica* between the two groups, the authors found a higher prevalence of the *bio*4 strain in the *bio*4 group. This is in contrast to the results of the other studies, which found no significant differences in the prevalence of *Y. enterocolitica* between the two groups.

[illegible][illegible]

The first part of the paper is devoted to the study of the
 asymptotic behavior of the solution of the problem
 (1.1)–(1.3) as $\epsilon \rightarrow 0$. In the second part, the
 asymptotic expansion of the solution is constructed.
 In the third part, the asymptotic expansion of the
 solution is used to obtain the asymptotic expansion of
 the functional $J(u_\epsilon)$. In the fourth part, the
 asymptotic expansion of the solution is used to obtain
 the asymptotic expansion of the functional $J(u_\epsilon)$.

1. The first step is to identify the key components of the system. This includes understanding the hardware, software, and data involved.

$\frac{1}{2} \times \frac{1}{2} = \frac{1}{4}$

DOI: 10.1002/for

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: a control group and an experimental group. The control group received a standard dose of 10 mg/kg of morphine, while the experimental group received a higher dose of 20 mg/kg. The subjects were then subjected to a series of tests, including a pre-test, a post-test, and a follow-up test. The results of the tests were analyzed using a two-way ANOVA.

RP Reds now train Maoist rebels in India

Hopes high MVP won't desert Blue Eagles

By [Name] 10/10/10

It's a little early to say, but the Blue Eagles' MVP, [Name], is expected to stay with the team. The player, who has been a key contributor to the team's success, is expected to continue his role as a leader on and off the field. The team's management is confident in his loyalty and expects him to continue to lead the team to further success.

Injured Jeson easy prey in Japan finals

Jeson, who has been a key player for the team, was injured during the Japan finals. The injury was a significant blow to the team, as Jeson has been a consistent performer. The team's management is working to get Jeson back on his feet as quickly as possible, but the injury may require a longer recovery period. The team is looking for ways to compensate for his absence during the upcoming matches.

2 Pinoy pups make it to metal round

Two Pinoy pups, [Name] and [Name], have made it to the metal round of the competition. The two young players have shown exceptional talent and skill, earning them a spot in the next round. Their coaches and fans are proud of their achievement and expect them to continue to improve and succeed in the future.

Rookie-laden Archers no FIBA Flying V pushovers

The Archers, a team known for their rookie players, are not pushovers in the FIBA Flying V competition. They have shown resilience and skill, competing hard against the top teams. The team's management is proud of their performance and expects them to continue to grow and improve as the season progresses.

Blast from the past at 35th year rites

The 35th year rites were a blast from the past, featuring many nostalgic elements. The event was a celebration of the team's history and achievements, with many former players and coaches in attendance. The atmosphere was festive and nostalgic, reminding everyone of the team's long and successful history.

The 35th year rites were a success, with many memorable moments. The team's management and players were all in good luck, and the event was a great celebration of the team's history. The team is looking forward to continuing its success in the future.

Hope UST Shakey's girls volley favorites

UST Shakey's girls volleyball team is one of the favorites for the upcoming season. The team has a strong roster of players and a coach with a proven track record. Fans and analysts are all looking forward to seeing the team in action and expecting them to be a top contender for the championship.

MANDALUYONG PNP CONTROVERSY

9-man police team sacked

By J. R. R.
 A nine-man police team was sacked by the Department of Justice (DOJ) for allegedly using excessive force during a raid on a suspected drug den in Mandaluyong City. The team, led by a senior police officer, was accused of mistreating several individuals during the operation. The DOJ has ordered a full investigation into the incident and has suspended the involved officers pending the results of the probe.

Ombudsman dismisses raps vs Tinga

By J. R. R.
 The Office of the Ombudsman has dismissed a complaint filed against a police officer named Tinga. The complaint, which alleged misconduct, was found to be unsubstantiated after a thorough review of the evidence. The Ombudsman's decision is final, and no further action will be taken against Tinga.

THE **WORLD'S** **WILDEST** **WEDDINGS**

Figure 1. (a) A photograph of the experimental setup. (b) A schematic diagram of the experimental setup. The diagram shows a laser source, a beam splitter, a lens, a sample, and a detector. The laser source emits a beam that is split into two paths. One path goes through a lens and a sample, and the other path goes through a lens and a detector. The two paths are recombined at the beam splitter.

Figure 1: Schematic representation of the experimental design. The figure is divided into two main sections: 'Pretest' and 'Main Experiment'. The 'Pretest' section shows a flow from 'Pretest' to 'Main Experiment'. The 'Main Experiment' section shows a flow from 'Main Experiment' to 'Posttest'. The 'Main Experiment' section is further divided into 'Pretest' and 'Main Experiment' sub-sections. The 'Pretest' sub-section shows a flow from 'Pretest' to 'Main Experiment'. The 'Main Experiment' sub-section shows a flow from 'Main Experiment' to 'Posttest'. The 'Main Experiment' sub-section is further divided into 'Pretest' and 'Main Experiment' sub-sections. The 'Pretest' sub-section shows a flow from 'Pretest' to 'Main Experiment'. The 'Main Experiment' sub-section shows a flow from 'Main Experiment' to 'Posttest'.

[illegible]

The figure consists of two side-by-side graphs, labeled (a) and (b). Both graphs have 'Rate of Reaction (g/min)' on the y-axis and 'Temperature (°C)' on the x-axis. Graph (a) shows a curve that starts at a low rate at low temperatures and increases exponentially as temperature rises, representing a reaction with a positive activation energy. Graph (b) shows a curve that starts at a high rate at low temperatures and decreases as temperature rises, representing a reaction with a negative activation energy.

DTI upbeat on investments Co-ops post \$311M in savings

BCH: Peza post increase to protect registrations

By Elpidio A. Iba

MANILA, April 1 (AP) — The Department of Trade Integration (DTI) is optimistic about the country's investment prospects, particularly in the electronics and telecommunications sectors, as it seeks to attract foreign capital.

DTI Secretary General Romeo Peza said that the department has received a significant number of inquiries from foreign investors, particularly from the United States and Japan, regarding investment opportunities in the Philippines.

Peza noted that the DTI has been actively promoting the country's investment incentives, including the Special Economic Zone (SEZ) program, which offers tax and customs benefits to investors.

He also mentioned that the DTI has been working closely with the Department of Finance (DOF) to streamline the investment process and provide a more favorable business environment for investors.

Peza emphasized that the DTI's primary goal is to attract foreign investments that will create jobs and contribute to the country's economic growth.

He stated that the DTI has been successful in attracting investments in various sectors, including manufacturing, services, and infrastructure.

Peza also mentioned that the DTI has been working on improving the country's infrastructure, particularly in the areas of transportation and telecommunications, to make it more attractive to investors.

He concluded by saying that the DTI is confident that the Philippines will continue to be a prime destination for foreign investments in the years ahead.

Ban Wagon effect

Stanchos

Photo of Stanchos

Stanchos, a well-known figure in the Philippine entertainment industry, has been the subject of a ban on his appearances in public places. The ban was imposed by the local government of Manila, citing concerns over public safety and the potential for disruption.

Stanchos, who is a popular actor and comedian, has expressed his disappointment over the ban and has vowed to continue his work in the industry. He has also stated that he will continue to support the local government's efforts to maintain public order.

The ban has sparked a debate over the rights of celebrities and the responsibilities of the local government. Some argue that celebrities should have the right to freedom of movement, while others believe that the government has the right to restrict their movements if it is necessary for public safety.

The ban has also had a significant impact on Stanchos's career. He has been unable to perform in his usual venues, and his appearances in public places have been limited. This has led to a loss of income for Stanchos and his associates.

Stanchos has been seeking legal recourse against the ban, but the local government has refused to lift it. The case is currently pending in court.

SPECIAL PRICES

ATC Cars

ATC Cars is offering special prices on a variety of vehicles, including cars, trucks, and vans. The prices are significantly lower than the market rates, making it an excellent opportunity for buyers.

The vehicles are all in excellent condition and have been thoroughly inspected by ATC Cars. They are also all equipped with the latest features and accessories.

ATC Cars is located at 1000 Pineda, 1st Fl. P.O. and is open from 9:00 AM to 6:00 PM, Monday through Saturday.

INVENTORY SALE

WALVE

WALVE is having a large inventory sale on a variety of goods, including clothing, shoes, and accessories. The sale is taking place at 1000 Pineda, 1st Fl. P.O. and is open from 9:00 AM to 6:00 PM, Monday through Saturday.

The goods are all in excellent condition and have been thoroughly inspected by WALVE. They are also all equipped with the latest features and accessories.

WALVE is located at 1000 Pineda, 1st Fl. P.O. and is open from 9:00 AM to 6:00 PM, Monday through Saturday.

SMI proposes \$40-B war chest for acquisitions

SMI

SMI, a major Philippine conglomerate, has announced a plan to raise a \$40-billion war chest for acquisitions. The plan is part of SMI's long-term strategy to expand its operations and increase its market share.

SMI's Chairman, Carlos M. M. M., stated that the company has identified several potential acquisition targets in various sectors, including manufacturing, services, and infrastructure. He said that the company is currently in the process of evaluating these targets and determining the best way to proceed.

SMI has a long history of successful acquisitions and has grown into one of the largest and most powerful conglomerates in the Philippines. The company's assets include a wide range of businesses, from manufacturing and services to real estate and infrastructure.

SMI's plan to raise a \$40-billion war chest is a significant move, as it would give the company the financial resources it needs to pursue its acquisition strategy. It would also demonstrate SMI's confidence in its long-term prospects and its ability to execute its plan.

Focus is a leader in the automotive industry, and its vehicles are known for their reliability and performance. The brand has a long history of producing high-quality vehicles that meet the needs of a wide range of customers.

9-day trial

257-7695 to 99

Focus is offering a 9-day trial on its vehicles. This is a great opportunity for customers to test drive a Focus vehicle and see for themselves why it is so popular. The trial is available on all Focus models, and it is a great way to experience the quality and performance of a Focus vehicle.

Call 257-7695 to 99 to learn more about the 9-day trial and to reserve your Focus vehicle. The trial is available on all Focus models, and it is a great way to experience the quality and performance of a Focus vehicle.

BUSINESS

Maynilad sets '10 capex at ₱6.6B

By H.H.A. C. Middelmeijer

Figure 1. Schematic representation of the experimental design. The figure shows a sequence of events: a subject is presented with a stimulus (a word or a picture), then they are asked to perform a task (e.g., to identify the stimulus), and finally, they receive feedback (e.g., a correct or incorrect response). The sequence is repeated for multiple trials, and the results are analyzed to determine the effect of the stimulus on the task performance.

Why psychic surgeons baffles scientists

MANILA, PHILIPPINES — It's a common sight in the Philippines: a man in a white lab coat, a stethoscope around his neck, and a surgical mask, performing a procedure on a patient. But what if the procedure is not a medical one, but a psychic one?

In the Philippines, there are many "psychic surgeons" who claim to be able to perform surgery on their patients without the use of any medical equipment. They claim to be able to feel the location of the problem and to perform the surgery using their hands.

Some of the most famous psychic surgeons in the Philippines are Dr. Juanito Dela Cruz and Dr. Juanito Dela Cruz. They claim to be able to perform surgery on their patients without the use of any medical equipment.

However, scientists are baffled by their claims. They say that there is no scientific evidence to support their claims. They say that the patients who claim to have been cured by psychic surgery are likely to be placebo effect.

Despite the lack of scientific evidence, many people in the Philippines still believe in psychic surgery. They say that it is a miracle and that it is the only way to cure their problems.

The question is: how can we explain this? Is there something about the human mind that allows us to perform surgery without the use of any medical equipment? Or is it just a placebo effect?

Only time will tell.

The figure consists of a 5x5 grid of 25 small, square images. Each image shows a different stage of chick embryo development. The images are arranged in a grid with rows and columns labeled with numbers 1 through 5. The sequence shows the progression of the embryo from a single cell to a fully formed chick ready to hatch from the egg.

BIG DEAL FROM

BASED IN THE DARK

WILLIAM SHATNER'S
WALKER BLOOD

IMAX

IMAX is the world's largest movie format. It provides a more immersive experience than any other format. The sound is also more powerful and clear. The images are sharper and more detailed. The overall effect is more realistic and more enjoyable.
